Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3748

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Terms such as "particularly" on line 6 of claim 1, "preferably" on line 3 of claim 12, are vague and indefinite and should not be used in claim language.

The claimed subject matter in claim 11 "scraping element for keeping the supporting bars" is not understandable because there is no reference numeral in the drawings to show that element.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 5-8, 10-13, are rejected under 35 U.S.C. 102(b) as being anticipated by DE 4338103.

DE 4338103 discloses a wave energy power plant comprising many linear generators GEB between an upper and lower carriage (figure 9), floating bodies SPG, buoyancy tanks BA, cables AKA, figures 5-6 clearly show the permanent magnets as claimed in claim 2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3748

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-4, 9, are rejected under 35 U.S.C. § 103(a) as being unpatentable over DE 4338103 in view of WO 2004/027257 (Manchester). DE 4338103 discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose an AC/DC converter. Manchester is relied upon to disclose wave energy power plant comprising AC/DC converter 14. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide DC/AC converter in DE 4338103 as taught by Manchester for the purpose of delivering AC electrical signals to drive appropriate devices.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Woodbridge et al, Melvin, Curry, Rich, disclose wave energy power plants using floats and tanks.
